

# Master class

## international and interdisciplinary workshop

### 2018

Comprehensive transformation of the region with wooden constructions

Lectures of experts from practice:

The essence of wood in touristic and sport infrastructure

**Tuesday, 8.5.2018 at 10:00**

Faculty of Architecture, Fra Andrije Kačića Miošića 26, 10000 Zagreb

*As part of the international and interdisciplinary workshop, Master class, organized by proHolz Austria, association for the promotion of wood, in collaboration with TU Graz, University of Zagreb and University of Ljubljana, will be held the lectures by renowned architect and engineer from Austria.*

**Architect Ferdinand Reiter, architectural office Unverblümt**

Co-author of the multiple wooden touristic buildings, among which stands out Gradonna mountain resort, will in his lecture present some of his most interesting projects, like: Gradonna mountain resort, Wildalpen and Passail. His touristic facilities use all the advantages of wooden modular construction and with their shape as material use, complement the image of the surrounding landscape.

**Engineer Kurt Pock, KPZT**

With his engineering office, in which they are solving the most demanding structural challenges of the wooden constructions. One of their last projects is Red Bull Energy Station, modular wooden construction for the hospitality of the MotoGP races, with area 600m<sup>2</sup> and can be mounted in 2 days and need 13 trucks for the transportation. His lecture will focus on the challenges and solutions for constructing wooden sports facilities of larger spans.
